

Mission •
to prevent and cure diabetes
and to improve the lives of all
people affected by diabetes.

October 13, 2011

Dear Jocelyn Sands:

Thank you for your recent donation of \$1, 952.00 to the American Diabetes Association (ADA) to support diabetes research. Because of your generosity, the ADA is able to support vital research aimed at finding a cure for all types of diabetes.

In a recent report released by the CDC, it estimated that by the year 2050 1 in 3 adults will have diabetes, if current trends continue. We are truly grateful that the residents of Second Life continue are dedicated to helping us stop that trend. Because of your support, we are able to continue the important work of finding a cure for this debilitating disease. But until that time, our goal is to help those with diabetes live a productive and healthy life and reduce or avoid terrible complications such as heart disease, kidney disease and blindness.

Thank you again for your generous support, which makes such a difference in the lives of those with diabetes.

Sincerely,

Jeanette M. Grimes
